

Virtual Camp Programs

Be ready for training, be ready for staff, be ready for campers. Be ready with PA!

Yes, we are providing training for camp staff right now! While we are changing our delivery method in some instances, the essence of Project Adventure will not be lost. Our trainers are here to design online and in-person (when possible) training that gets your camp staff ready to create safe, meaningful and fun experiences of a lifetime.

Challenges camps and outdoor centers are encountering...

- Building staff community and familiarity while still meeting virtually
- Disruptions in training for summer and fall programming; both technical skills and activity-based programming
- Clarity in how and when to run in-person adventure programs safely and effectively

PA facilitates...

- Interactive, engaging and fun online and asynchronous activities using a variety of digital platforms for camp staff
- Remote training to prepare staff for in-person programming (technical or SEL) when conditions allow
- Industry best practices for new COVID protocols for safe challenge course operations

Who can benefit:

- Summer camps
- Out-of-School Time programs
- Outdoor education center

We can custom design and facilitate a virtual program for your organization. Programs can vary in length and number of sessions to meet your schedule and desired outcomes.

We will lead engaging activities that encourage participants to learn, practice, and explore 'traditional' adventure and new skills for a range of COVID adaptive conditions.

What it looks like...

- Experiential and interactive
- Blended and integrated: online and asynchronous
- Use of collaborative digital platforms
- SEL and teambuilding activities
- Customized for your needs

Call 978.524.4501 or email info@pa.org to begin the planning process for your virtual adventure!
